

AOAMI Announces:

AOAMI Advanced EMR Tutorial Tuesday, October 28, 2008 8:00am – Noon

Maximize the Effectiveness of Your EMR

**Allen Wenner, MD
John Bachman, MD**

This is an advanced class for physicians who have had their EMR in place for at least three months. The attendees may either be struggling to realize the full potential of their system or simply be interested in learning more possibilities for EMR use.

The class will focus on workflow analysis and implementation of software at the point of care in an informal seminar format.

Attendees will learn:

- 1) How to progress through the stages of EMR utilization to a paperless environment;
- 2) Pitfalls of the transition to and adoption of point of care solutions;
- 3) Considerations in improving office workflow to maximize the use of EMR technologies;
- 4) Integrating new opportunities such as portals, eVisits, and local pharmacy-based outreach clinics into the primary care office processes.

This class is based on the text “The Toyota Way” by Jeff Liker which should be read prior to attendance.

Drs. Bachman and Wenner are well-known healthcare technology “gurus,” frequent speakers at medical conventions, often quoted in medical journals, and contributing authors to current textbooks on information technology in primary care.

**Attendance limited to 25 participants. Pre-Registration fee of \$50
(You must be registered for the AOA Convention to attend.)**
